FACEMATE

Salamander Controller Model S2
S-SLM-CTLS2

Temperature   Card Reader
Humidity   SNMP
Water Leak   Wireless Sensors*
Dry-contact   IP Camera*
PIR*   SMS Text*

The Salamander Controller Model S2 greatly expands the connectivity options over the Controller Model S.

In addition to temperature and humidity sensors, leak detectors and door open sensors, a 4 relay output board and proximity card readers are now supported.

The unit collects data from several inputs and from SNMP devices like Smart PDUs and manages alarms, emails, reports and SMS text messages.

Data is stored internally in a database and Reports with historical data can be produced and e-mailed automatically.
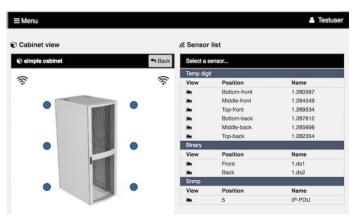

The Salamander Controller Model S2 can manage several wireless satellite units for additional connectivity options.

Supports: HTTPS, SMTP, SNMP V2, FTP, Ethernet 100Mbps, WiFi, GSM satellite*, Access Control features*, IP Cameras, and more.

Web Interface   SNMP
Dashboards   SMS Text*
Reports   4 Relay board*
e-mail

*Requires additional components

Specifications

- Ethernet Port
- Digital Sensor Connectors
- Temperature & humidity sensor port
- Dry contact input/output ports
- Loaded with Salamander S-SLM-BS01 software package
- 2 x USB Ports for External storage connection and firmware updates
