

Electronic Door Lock with RFID Card Reader S-SLM-DLW2

Electronic Door Lock With RFID Card Reader

The Electronic Door Lock with RFID card reader integrates seamlessly with the Salamander Access Controller system to provide secure access to Data Center Cabinets and zones.

To operate properly, the Electronic Door Lock with RFID card reader must be connected to a Salamander Satellite AC. It's fully compatible with other access control systems.

The satellite connects wirelessly to a master controller which offers full Environment management and Access Control features.

Specifications

- Power 12V DC
- Less than 200 milliamps operating current
- Fits Facemate DC cabinets and other with 25mm x 150mm cutoff
- Metal body and handle
